PMT Data Analysis

- ## Error Analysis

  -Found sources of uncertainty on the Correction Factor, Attenuation Factor (att_fac_darkbox1.xls), and Gain measurements (PMT_Gain_1.xls), and calculated the error propagation

  -Will wrap up statistical vs. systematic analysis

- ## Graphing Techniques

  -Used PAW Kumacs to fit data with error bars and plot.

- ## Gain Results

  -Results from the two different dark boxes are consistent with each other within their uncertainties

- ## Can compare Results with JLab Tests

DB1 & DB2 Gain fitted with same line.
